

**# ⚠ Digital Vehicle Documents: Photos, Screenshots, or PDF copies are \*\*not valid\*\***

In today's time, keeping your vehicle's documents digitally is **completely legal and safe** in India — but only if done through the 'approved and official apps.'

## Legal and Safe Methods to Store Vehicle Documents Digitally

### 1. DigiLocker App

- \* This is India's official government digital document storage app.
- \* Here you can link and store your -Driving License, RC, Insurance, PUC, etc. directly from the government database.
- \* It is approved by the -Ministry of Electronics and IT (MeitY).
- \* If traffic police or any officer asks, showing the document inside the app is fully valid.

### 2. mParivahan App

- \* This is the -official app of the Transport Department (MoRTH).
  - \* Driving Licence (DL) and Vehicle RC are fetched directly from the -government records.
  - \* It includes a 'QR code', making it verifiable and authentic.
  - \* Traffic police accept this as a -completely valid document.
    - ✓ Documents that can be shown as valid digital copies
- If the following are stored in DigiLocker or mParivahan,  
you 'don't need to carry paper copies:

1. Driving License (DL)
2. Vehicle Registration Certificate (RC)
3. Insurance Certificate
4. Pollution Under Control Certificate (PUC)

## 1. Mandatory Offline Documents (if not using digital versions)

You must carry these while driving:

- \* Valid Driving License
- \*RC (Registration Certificate)
- \*PUC (Pollution Under Control Certificate)
- \*Insurance Paper
- \*Aadhaar or other ID proof

-:  Responsibility of Parents :-

- \* Never allow a child \*\*below 18 years to drive any motor vehicle.
- \* Teach them about \*\*traffic rules, signals, and safety.
- \* Mental and physical maturity is not complete before 18.
- \* The risk of accidents is much higher.
- \* Lack of full knowledge of traffic laws can endanger others on the road.

> Life is one — it is our duty to drive safely.

 **Life is Precious — Drive Safely**

Life is only once. Every day we travel roads while our loved ones wait for us to return home.

Riding a bike without a helmet, talking on the phone while driving, or breaking traffic rules is not just illegal — it's risking your life and others' lives.

A moment of carelessness can push a family into darkness.

**Drive carefully — for yourself and for those who love you.**

## Special Awareness: Blind Spot Awareness

Drivers of large vehicles like trucks, lorries, or buses cannot see certain areas around their vehicle.

These invisible areas are called Blind Spots. Blind Spots are usually:

- \* Right in front of the vehicle (under the cabin)
- \* On both sides, especially the right
- \* Directly behind the vehicle

: How to stay safe :

1. Never stay close beside or behind large vehicles.
2. If you can't see yourself in the driver's mirror, the driver can't see you either.
3. Stay away when trucks turn or change lanes.
4. Give signals and maintain distance while overtaking.
5. Keep a safe gap to avoid sudden braking accidents.

- > Remember: Truck drivers can't see everything — but you can.
- > Safety starts with you.

## Night-Time Road Safety — Reflectors Must Be Made Mandatory

- a) At night, slow-moving vehicles like bicycles, rickshaws, e-rickshaws, carts, or animal-driven vehicles are hard to see, increasing the risk of accidents.
- b) A red rear reflector disc on a bicycle reflects headlight beams from vehicles behind, making them visible from a distance.

- > Therefore, attaching reflectors to all slow-moving or non-motorized vehicles should be made mandatory.
- > It ensures visibility at night and prevents accidents.

**"Your vehicle may be small, but the importance of safety is never small."**

\*Attach reflectors at night — save lives from accidents.

ক) রাতে বাইসাইকেল, রিকশা, টোটো, ভ্যান, গরুর গাড়ি, ঘোড়ার গাড়ি ইত্যাদি যান দূর থেকে দেখা যায় না, ফলে দুর্ঘটনার ঝুঁকি বেড়ে যায়।

খ) সাইকেলের পিছনে থাকা লাল প্রতিফলক চাকতি গাড়ির হেডলাইটের আলো প্রতিফলিত করে, ফলে পিছন থেকে আসা যানবাহন সহজে দেখতে পায়।

[এই কারণে সকল ধীরগতির বা অ-যান্ত্রিক যানবাহনের পিছনে প্রতিফলক লাগানো বাধ্যতামূলক করা উচিত। এতে রাতের বেলায় দূর থেকে স্পষ্ট দেখা যায় ও দুর্ঘটনা রোধ হয়।]

-: মনে রাখবেন :-

“আপনার গাড়ি ছোট হতে পারে, কিন্তু নিরাপত্তার গুরুত্ব কখনও ছোট নয়।”  
রাতে প্রতিফলক লাগান — দুর্ঘটনা থেকে জীবন বাঁচান।
